

RoHS Certificate of Compliance

European Union Directive 2002/95/EC ("RoHS") restricts the usage of certain hazardous substances in electrical and electronic equipment that is placed on the market in the European Union, after July 1, 2006. Based upon information made known to Hamilton Beach/Proctor-Silex, Inc. ("HB/PS") as of the date of this Certificate of Compliance, HB/PS hereby declares and certifies that the following products are RoHS Compliant, for orders placed on or after the date of this Certificate of Compliance:

Brand Name	Product Description	Model Number
Hamilton Beach Commercial		

Basis for HB/PS Certificate of Compliance:

- HB/PS' Suppliers have provided written confirmation, including laboratory test data, that the above-listed products are RoHS Compliant; and,
- HB/PS has implemented an audit procedure to monitor those Suppliers.

Significance of HB/PS Certificate of Compliance:

This Certificate of Compliance means that the above-listed products fully comply with RoHS standards, because (a) they contain no restricted substance at concentrations that exceed the following maximum values, or (b) removal of the restricted substances is not technically feasible and their presence at levels above these concentrations is specifically allowed by RoHS and/or exemptions to RoHS:

- ≤ .1% by weight in homogenous materials for lead;
- ≤ .1% by weight in homogenous materials for hexavalent chromium;
- ≤ .1% by weight in homogenous materials for mercury;
- ≤ .1% by weight in homogenous materials for polybrominated biphenyls;
- ≤ .1% by weight in homogenous materials for polybrominated diphenyl ethers; and,
- ≤ .01% by weight in homogenous materials for cadmium.
